Overview

Frontier Pitts Middle East is a leading supplier of security solutions, specializing in the manufacturing and installation of barriers, gates, road blockers, bollards, and pedestrian control gates and turnstiles.

With a strong emphasis on safety and security, Frontier Pitts caters to various industries including airports, government buildings, border stations, educational institutions, data centers, public utility stations, and banks.

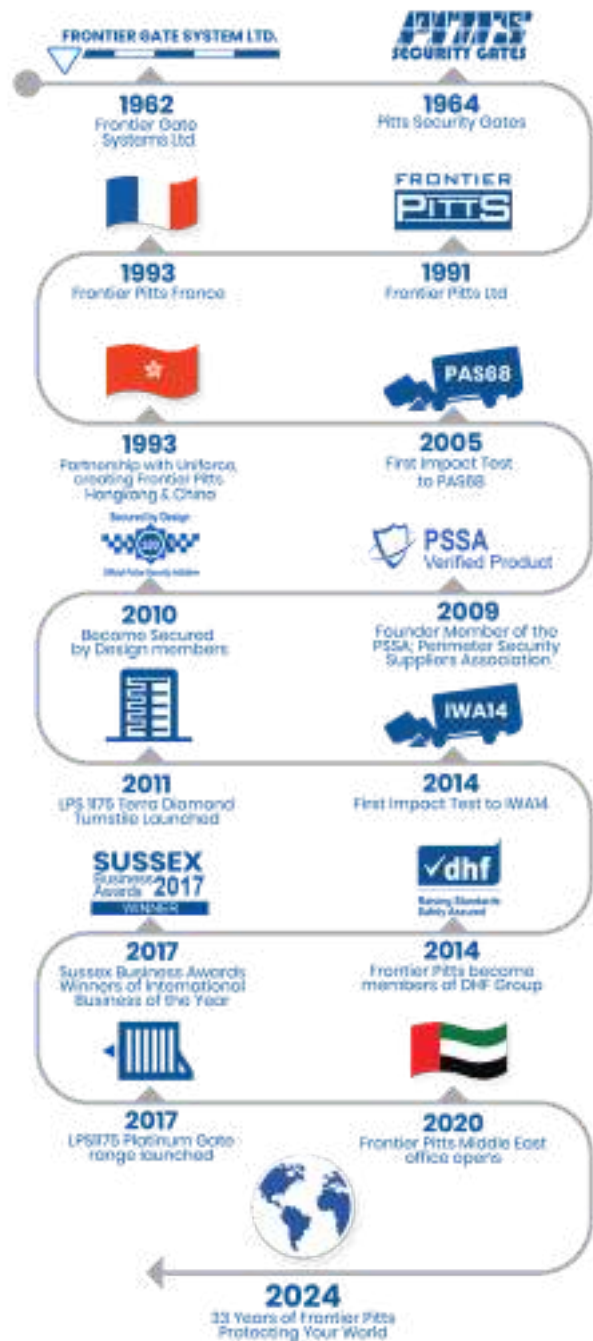

Company History

Frontier Pitts is globally recognized for its exceptional British engineering, with every piece of equipment meticulously designed and custom-made at our UK Head Office.

Our presence is strong in the Middle East, with our regional headquarters in the UAE delivering tailored security solutions. We lead the European and African markets from our office in Nîmes, France, and operate extensively across Asia from offices in China and Hong Kong.

Our global reach is supported by installations in over 90 countries, multilingual project management teams, and partnerships throughout the Middle East and worldwide.

The highly respected and well-established product portfolios of Frontier Gates and Pitts Security Gates were the foundation of what Frontier Pitts has achieved over the last three decades and who we are today.

Mission

FRONTIER
PITTS
MIDDLE EAST

Our mission is to design and manufacture exceptional gates, road blockers, bollards, and barriers that combine innovative engineering, superior craftsmanship, and unparalleled functionality. We are committed to delivering high-quality products that enhance security, privacy, and aesthetics.

A key aspect of our commitment to quality is our LPS 1175 certified gates. The LPS 1175 certification, issued by the Loss Prevention Certification Board (LPCB), is a globally recognized standard that assesses the resistance of physical security products against forced entry. This certification ensures that our gates meet rigorous standards, providing robust protection against burglars, intruders, activists, and other threats. By incorporating LPS 1175 certified gates into our product range, we emphasize our dedication to delivering superior security solutions that safeguard lives and assets.

Our aim is to protect lives and secure public spaces through the design and manufacturing of cutting-edge hostile vehicle mitigation products. With a focus on engineering excellence, rigorous testing, and ongoing research, we strive to deliver superior products that surpass industry standards. Our mission extends beyond physical security, as we actively collaborate with stakeholders to raise awareness, educate, and promote best practices in hostile vehicle mitigation.

Our Services

MANUFACTURING

At Frontier Pitts Ltd, we specialize in the manufacturing of high-security gates, barriers, and bollards. Our products are designed and produced to meet rigorous international standards, ensuring robust security solutions for a wide range of applications, including critical infrastructure and public spaces. Our manufacturing processes emphasize innovation, quality, and reliability to deliver advanced security solutions.

PROJECT MANAGEMENT

We provide end-to-end project management services, guiding security installation projects from initial planning to final commissioning. Our experienced project managers ensure seamless coordination, timely execution, and adherence to budget constraints. Our service includes detailed consultations, custom design solutions, and continuous support to meet the specific security needs of each client.

MAINTENANCE

We offer comprehensive maintenance services for our security products, ensuring optimal performance and longevity. Our maintenance programs include regular inspections, preventive maintenance, and prompt repair services. This proactive approach minimizes downtime and ensures that security installations remain fully operational and effective over time.

WARRANTY

We offer a 12-month warranty on all products and services from the delivery date, contingent on regular maintenance by qualified engineers. We recommend maintenance contracts to ensure longevity and provide training programs for on-site engineers to maintain equipment effectively.

Product Range

Frontier Pitts Middle East offers a comprehensive range of security products, including barriers, gates, bollards, road blockers, and turnstiles. Their solutions are designed to provide robust protection and efficient access control for various environments. Our products ensure safety and operational efficiency by preventing unauthorized vehicle and pedestrian access. All products are designed and manufactured by Frontier Pitts Ltd.

BARRIERS

We manufacture high-security barriers, including Hostile Vehicle Mitigation (HVM) and security car park barriers. Designed to control vehicle access and prevent vehicle-as-weapon (VAW) attacks, these barriers are durable and meet stringent international security standards, ensuring robust protection and reliability.

BLOCKERS

We produce robust road blockers designed for high-security applications. These road blockers provide effective vehicle access control and protection against unauthorized entry. Engineered to meet stringent international standards, they offer reliable and durable security solutions for various environments.

BOLLARDS

We manufacture high-security bollards available in static, automatic, and removable options. These bollards are designed to protect pedestrians and infrastructure from vehicular threats. Built to withstand significant impact, they meet rigorous international standards, ensuring both durability and reliable performance in high-risk environments.

GATES

At Frontier Pitts Ltd, we produce high-security gates, including sliding, swing, and bi-folding options. Our range includes bullet-resistant, crash-rated, and LPS 1175 Platinum gates (SR1, SR2, and SR3) tailored to various requirements. Engineered to meet stringent standards, our gates ensure robust access control and enhanced protection against unauthorized entry.

TURNSTILES

We offer full-height and high-security turnstiles, including the LPS 1175 Platinum Turnstile (B3), designed for effective pedestrian control and access management. Engineered for reliability and durability, our turnstiles ensure secure and smooth operation in various environments, meeting stringent international standards for robust security and efficient entry management.

Our Projects

At Frontier Pitts Middle East, we take pride in delivering comprehensive security solutions tailored to meet the unique needs of each project. From initial consultation through design, installation, and ongoing maintenance, our team ensures every detail is meticulously managed to provide maximum safety and operational efficiency. Our commitment to innovation and adherence to the highest industry standards guarantees that your project receives the best in security technology and expertise.
