

TERRA STATIC COMET BOLLARD IWA 14 3.5t at 48kph

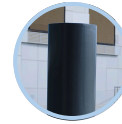

Enhance security with the Terra Static Comet Bollard IWA 14, designed to stop a 3.5-ton vehicle at 48kph. These bollards feature a robust polyester powder-coated finish and offer customizable sleeve options, providing reliable protection with a sleek appearance.

The Terra Static Comet Bollard IWA 14 3.5t at 48kph is designed and tested to provide robust protection against vehicular threats, making it an ideal choice for securing sensitive locations and high-risk environments. This bollard has been rigorously tested according to the International Workshop Agreement (IWA) 14 standards, specifically to stop a 3.5-ton vehicle traveling at 48kph. This level of security ensures that the Terra Comet can effectively neutralize vehicle-borne threats, thereby safeguarding public spaces, commercial sites, and critical infrastructure.
